DETAILED ACTION

This action is in response to Request for Continued Examination filed April 11, 2006 and Amendment filed March 14, 2006. Claims 1, 11 and 20 have been amended as requested by the applicant.

Response to Arguments

Applicant's arguments, see Amendment, filed March 14, 2006, with respect to claim 1 have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn. Applicant amended claim 1 to overcome the prior art of record.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to teach or suggest an anti-aliasing filter comprising a substrate; a first double refraction plate (DRP) adapted to separate an incoming ray into an ordinary ray and an extraordinary ray having at least a first liquid photo-polymerization (LPP) layer having an optical axis oriented at an angle non-parallel and non-perpendicular to a surface of the LPP layer connected to the substrate and a first liquid crystal polymer (LCP) layer

Art Unit: 2872

disposed on the LPP layer having an optical axis aligned with the orientation of the optical axis of the LPP layer, the orientation comprising an optical axis of the first DRP, the first DRP having a thickness and optical axis selected to provide a selected separation of the ordinary and extraordinary light rays such that the separation is large enough for the separated ordinary and extraordinary light rays to substantially illuminate two adjacent pixels of a photodetector array.

The remaining claims depend from claim 1 and are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
